Sub: Statistical package Statistica with Data Miner

Dear Sir,

I am delighted to inform you that the package that we have purchased recently has been successfully installed. There had been a demonstration-cum-tutorial that you have kindly arranged in December which was also a great help.

Currently our faculty, research scholars and graduate students are in the process of getting experience with the package. We particularly find the Dataminer module very useful for our teaching and research in statistical pattern recognition. It has a great potential to be used extensively in our future research by both faculty and research scholars.

We are also quite satisfied with the support and service that you have provided to us. We look forward to our continuing relationship regarding this matter.

With best wishes,

Smarajit Bose
