

STATISTICA VERSION 9 ADDENDUM: DEPLOYING 32-BIT STATISTICA CONCURRENT/ENTERPRISE WORKSTATION INSTALLER ON 64-BIT INSTALLATIONS

The 64-bit concurrent version of *STATISTICA* will allow users to install only on 64-bit Workstations. Because some environments may have a mix of 32-bit and 64-bit Workstations clients, the 32-bit version of *STATISTICA* is also included on a separate CD. These instructions describe how to install and deploy the 32-bit Workstation installer, so that both the 32-bit and the 64-bit version are available to Workstation clients.

First, follow the standard 64-bit concurrent server installation instructions included in your package. Those instructions will create the 64-bit workstation installer that 64-bit Workstations will use to install the 64-bit version. After that process is completed, follow these instructions to add a 32-bit Workstation installer so that 32-bit clients can install the 32-bit version of *STATISTICA*.

Notes:

1. The installation of the *STATISTICA Enterprise* network version entails two parts: a) a server installation, and b) workstation installations on each of the client machines. The program will not function if the client installations are not completed.
2. The server installation must be performed by a user with Administrator permissions to the server. The installation makes necessary changes to the system. Each client installation must be performed while logged on as an Administrator to the client computer. If you are prompted to reboot during the installation, you must log on with Administrator permissions after rebooting to complete the installation successfully.

32-bit Server Installation

1. After the installation of the 64-bit server, remove the 64-bit CD from the CD-ROM tray and insert the 32-bit CD.
2. The *Setup Wizard* should launch automatically. If it does not, open *My Computer* or *Windows Explorer*, and right-click on the CD drive in order to explore the CD. Double click on the *setup.exe* file in the *English* folder to start the Setup Wizard.
3. As the installation begins, a warning message will be displayed, indicating that *STATISTICA* is currently installed. Click the *OK* button on this message box.
4. Click the *Next* button to continue with the installation.
5. Enter the Serial Number, CD Key, Net ID, and Install Code, as you did with the 64-bit installation.
6. In the *License Agreement* dialog, read the software license agreement. Select the *I accept the terms in the license agreement* option, and click the *Next* button if you agree with the terms and want to continue the installation process.
7. In the *Setup Type* dialog, select the *Typical* option. Click the *Next* button to continue.
8. A warning message will be displayed, indicating that the *STATISTICA* License Service is already installed on this machine. Click the *OK* button on this message box.
9. A warning message will be displayed, indicating that *STATISTICA* is already installed on this machine. Click the *OK* button on this message box.
10. Continue with the installation in the same manner as you performed the 64-bit installation, including the license registration process.

11. A dialog message will be displayed, indicating that the installation is complete. Click the *Finish* button.
12. Create a network share to both the 64-bit and 32-bit *STATISTICA 9* program file folders. By default, the 64-bit folder is located at C:\Program Files\StatSoft\STATISTICA 9 and the 32-bit folder is located at C:\Program Files (x86)\StatSoft\STATISTICA 9. When creating names for the shared folders, indicate whether the folder corresponds to the 64-bit or 32-bit program file folder.

Workstation Installation for 32-bit or 64-bit Versions

1. Ensure that no other applications are running.
2. Locate the appropriate share for the 32-bit or 64-bit version, depending on which version you will be installing on your Workstation. 32-bit machines must install the 32-bit version; 64-bit machines should install the 64-bit version. Double-click the *Setup.exe* file in the *Workstation Installer* subfolder.
3. The *Welcome* dialog will be displayed. Click the *Next* button.
4. In the *License Agreement* dialog, read the software license agreement. Select the *I accept the terms in the license agreement* option, and click the *Next* button if you agree with the terms and want to continue the installation process.
5. In the *Setup Type* dialog, select either the *Typical* or *Custom* option. *Typical* setup will install *STATISTICA* with the most common options; this is the recommended selection. *Custom* setup options are not covered in these instructions. If you have questions about the custom installation, contact StatSoft technical support. Click the *Next* button to continue.
6. If multimedia files are installed on the server, the *Install Multimedia* dialog will be displayed. Specify whether to install the multimedia files to your hard drive. These are videos providing overviews of various aspects of the *STATISTICA* system. It is recommended that you install them if you have sufficient disk space. Click the *Next* button to continue.
7. In the *Start Menu Folder* dialog, enter the Start Menu folder name; the default name is *STATISTICA 9*. If you want to create a desktop shortcut to *STATISTICA*, select the check box. Click the *Next* button to continue.
8. *STATISTICA* is ready to install on your workstation. To begin copying files to your machine, click the *Install* button.
9. Your system will be updated and program files will be installed. Click the *Finish* button on the *Setup Wizard Completed* dialog.

If you receive any Version Conflict messages, it is recommended that you keep your existing file (click the *Yes* button).

If the workstation's system files need to be updated, you must restart your computer to finish the installation process.

10. To start using *STATISTICA Enterprise*, double-click the *STATISTICA Enterprise* shortcut, and type in the default login name "Admin," and password "abcdef." *Enterprise Manager* will be displayed. At this point, you should change this default administrator password.

Server Uninstall

To remove the *STATISTICA Enterprise* server (for example, in order to install it on another server), follow these steps:

1. Ensure that no other applications are running.
2. In Windows XP, select *Start > Control Panel* and double-click *Add or Remove Programs*. In Windows Vista, select *Start > Control Panel* and double-click *Programs and Features*.
3. Scroll down through the list of programs; both *STATISTICA 9* and *STATISTICA 9 64-bit* are listed. Choose the *STATISTICA 9* option, and then click the *Remove* button.
4. A message will be displayed to confirm that you want to remove *STATISTICA* from your computer. Click the *Yes* button, and *STATISTICA* files will be uninstalled.

Workstation Uninstall

To remove *STATISTICA* (for example, in order to install it on another computer), follow these steps:

1. Ensure that no other applications are running.
2. In Windows XP, select *Start > Control Panel* and double-click *Add or Remove Programs*. In Windows Vista, select *Start > Control Panel* and double-click *Programs and Features*.
3. Scroll down through the list of programs and select *STATISTICA*. Click the *Remove* button.
4. A message will be displayed to confirm that you want to remove *STATISTICA* from your computer. Click the *Yes* button, and *STATISTICA* files will be uninstalled.

Notes on failed registration

1. The software registration process can fail for several reasons including: exceeding the allowed number of installations for a serial number, lack of internet connection on the installed machine, incorrect serial number, or other technical difficulties.
2. If you want *STATISTICA* installed on an additional computer, contact StatSoft for information on our policy and additional pricing.
3. If some other issue has affected your registration, ensure that the computer is connected to the internet, and verify your serial number. Start *STATISTICA*. From the *Help* menu, select *Register*.
4. If the registration process still cannot be completed, follow the instructions in the *STATISTICA* start-up dialogs, or contact Technical Support at (918)749-1119 or info@statsoft.com.
